DRAFT
NIST Security Working Group (WG) Agenda

August 10, 2011
Time: 2:00pm ET
Duration: 1 hour.
USA Toll Free Number: 866-819-5964
Passcode: 5576521
URL for web conference: http://webconf.soaphub.org/conf/room/cc_security

There are following updates on the Impediments and Mitigations List document:
- Write up of 3.1 from Ron Ross.
- Updates on 4.2 from Shilong Chu and Lee Badger.
- Updates on 4.3 from Lee Badger.

The purpose of this meeting is to follow the same pattern of detailed discussion of 3.4 Need Clear E-discovery Guidelines, 4.1 Lack of Visibility for Customer and 4.2 Lack of Control for Customer. We will decide the impediments to be discussed at the beginning of the meeting.

Goal: Mitigate security impediments that may prevent adoption of cloud computing by Federal agencies.

Main Deliverable: A document, the "Cloud Computing Security Impediments and Mitigations List". The document will contain a prioritized list of security impediments and, for each impediment, either a pointer to work that mitigates the impediment, or a description of approaches for mitigation.

Deliverables for other WGs: Security sections for the Reference Architecture document, the Business Use Cases, and the Standards WG roadmap document.

Deadlines for All Deliverables:

        initial draft in June, 2011
        new versions approximately every 2 weeks as appropriate
        Sep. 30, 2011 - final draft
